

MISSION

Explore our wide range of hi-tech solutions. We specialize turning the complicated into simple. We combine the huge benefits of today's tech and deliver control to you in one simple app.

VIDEO SURVEILLANCE

Capturing and retaining video of your place of business documents activity 24/7/365. Whether you have one location or 1000, E-Connect Technology offers excellent security options with the ease of control from your device, no matter where you are. Why wait for a problem to take advantage of you? Our solutions put you in control with the latest and best options.

HOME/OFFICE AUTOMATION

Your ability to streamline many services into one easy to use app will improve your day. Why depend on employees to turn lights on or off, raise or lower the thermostat or remember dozens of other key functions when a well-designed app can do it for you? Raise your efficiency quotient and save money. Once you see how it works for your business, you'll want it for home, too.

NETWORK INTEGRATION

Automation with remote control improves life and saves money. Reliability depends on the strength of your network—WIFI and wired connectivity. For flawless 4k streaming, hi-resolution audio and video, camera control, and dependable automation, your network must be rock-solid. Whether wireless or wired, our solutions solve your issues at work or home. We take what's complicated and make it simple for you.

SPEAKER INSTALLATION

Whether connected by Bluetooth or wire, placing speakers inside or out can be a challenge. Our team wins this game every time. You want sound "there?" No problem.

HOME THEATER

Immerse yourself in a fantastic world that surrounds you more than the recliner that embraces you. Experience the excitement of capturing tigers in the wild, fending off an alien attack or sitting on the 50-yard line of Lion's game as your home theater space transforms into something phenomenal. (Okay, maybe not the Lions). Our team will install technology that will keep you, your family and friends entertained like Hollywood intended.

ABOUT

What devices can accomplish in your life is truly breathtaking. Whether home or business, they offer benefits that yesterday's science fiction writers could only dream about. But devices have their own downside—they tend to control you. Put E-Connect Technology on the front line to end the frustration and watch the difference as devices do your bidding. We have assembled a group of top-notch professionals who are passionate about making that happen.

For the last ___ years, Ed Cross has operated Cross Digital. A main focus of his company has been video surveillance and integrating the data into networks. He often found himself working

alongside Carl Evanson and his team at A Plus Electric. A Plus Electric's has extensive experience in home/office automation, network integration, speaker installation and home theater. Combine Carl and Ed's companies and you have the genesis of what blossomed into E-Connect Technology.

E-Connect Technology has an expert team with over 80 years of combined low and high voltage experience. The company operates in separate space but within the same building as A Plus Electric at 9036 South Meridian Road (US127), Clark Lake.

The team is excited with the prospect of improving and solving issues in your legacy systems and developing entirely new, cutting-edge, solutions for you.
